Introduction: “Who do you think you are?”

“This question is not always an easy one to answer, as there are many factors and many people who try to tell us who we are. To complicate matters even more, our desperate longing for approval drives us to seek, to look, act, and be what we think others want rather than discovering who we really are. It’s a question we all grapple with and one that will determine in large measure the quality of our relationships and the level of contentment that we will experience in this life.”

- Factors that shape our lives

“Our family background, our environment, our personalities, the significant others and role models of our childhood, the values and beliefs systems we were taught, all play a critical role in the formation of our self-identity.”

- So, who are you …… really?

- If you don’t get a sober self-assessment of who you are, you will never fulfill the divine calling God has for you.
